max. coil size 10ft. O.D.
min. coil size 68" I.D.
- 5 Position adjustable coupler channel
- 2"- 2 1/2" ball or 3" pintel eye hitch
- Side gate loading
- Adjustable center roller bar
- Electric Brakes & Breakaway system - ICC Approved
- D.O.T. Ready - lights, reflectors, etc.
- Adjustable rear stabilizer post
- Empty weight: 2500 lbs.
- Overall Length: 18ft.
- Wheel chock and holders
- Steel Fenders & Catwalk
- 2 - 6000# Axle with 8 bolt hubs - 16" tires and wheels
- All Heavy-duty rollers and Bearings
- Heavy-duty channel and box tube style construction
- Adjustable Roller Arms For Correct Coil position with 7000# screw jack
- Safety Chains - Painted Black Gloss

OPERATION:

1. With trailer hooked on vehicle, open side gate
2. Using fork lift or back hoe lift coil up into position and hang on two horizontal rollers.
3. Using screw jack adjust center roller to position coil.
4. Close & latch gate. (Gate may be slid sideways to keep coil in a centered position.)
5. Slide gate in. If you feel necessary during layout procedure.
6. Wheel chocks & rear stabilizers are provided for your convenience.
7. Optional tracer wire holder available.
8. Optional Hydraulic McElroy line tamers available for 3"-6" pipe.
9. Optional Mechanical Ram Type pipe straightener available for 3"-6" pipe.

Miller "EZE-LOAD" Standard Poly layout trailer

MODEL #1050

OPERATION:

1. With trailer hooked on vehicle tilt table back to a horizontal position.
2. Hook winch cable to front of table or around coil.
3. Back trailer table into the coil, wind the small winch until the table breaks over center. The spool table will not crash down. A special air cylinder is in place to catch the weight and will lower the table gently to a level position. This cylinder will hold and automatically lower any weight of coil. Table frame latches down in a locked in mode for unspooling.
4. Four (4) vertical corner stakes are easily removable if necessary.
5. Four (4) additional turntable stakes are provided for centering large I.D. Coils.

STANDARD TRAILER:

- Capacity 3500# - 1" thru 4" any SDR and any coil size or length
- 5 Position adjustable coupler channel
- Eze-load: Self load and unload
- No boom or forklift necessary
- 2"-2 1/2" ball or 3" Pintel eye
- D.O.T. Ready - lights, reflectors, ect...
- Relief cylinder lowers coil smoothly
- Empty weight: 1070 lbs.
- Overall length 12ft.
- Vertical stakes removable if not needed
- 15" Radial tires with fenders
- Single 3500# Axle with springs
- 6000# 6-bolt spindle center spool construction
- Heavy-duty channel box tube style construction
- Heavy-duty screw type flip-up jack stand
- 2- speed heavy duty winch
- Turntable - Brake

Miller "EZE-LOAD" Rolling Tailboard Poly layout trailer

MODEL #2050 Rolling Tailboard

STANDARD TRAILER:

- Capacity 3500# - 1" thru 4" any SDR and any coil size or length
- 5 Position adjustable coupler channel
- Eze-load: Self load and unload
- NO boom or forklift necessary
- 2"-2½" ball or 3" Pintel eye hitch
- D.O.T. Ready - lights, reflectors, etc...
- 3 Bolt replaceable bearings on tailboard rollers
- Empty weight: 1000 lbs.
- Overall length: 12ft.
- Vertical stakes removable if not needed
- 4 - steel roller table support posts
- 15" radial tires with fenders
- Single 3500# Axle with springs

- 6000# spindle center spool construction
- Heavy-duty channel and box tube style construction
- 102" Round table for coil
- Heavy-duty screw type flip-up jackstand
- 2 - speed heavy duty winch
- Sliding adjustable center stakes

OPERATION:

1. With trailer hooked on your vehicle, simply stand coil on edge and back trailer Rolling Tailboard up to the coil. Attach winch strap & then wind the H.D. Winch until the coil breaks over center. Winch coil to center of round table & remove strap. Slide adjustable center stakes into position and tighten set bolts.
2. Table can be secured to trailer frame with small chain latch provided.
3. Four (4) vertical stakes are easily removed if necessary.
4. Painted Black Gloss.

Miller "EZE-LOAD" HEAVY DUTY Poly layout trailer

MODEL # 3050 Heavy-Duty

STANDARD TRAILER:

- Capacity 3500# - 1" thru 4" any SDR and any coil size or length
 - 5 Position adjustable coupler channel
 - Eze-load: Self load and unload
 - NO boom or forklift necessary
 - 2"-2½" ball or 3" pintel eye hitch
 - D.O.T. Ready - lights, reflectors, ect...
